Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 9-11, 16, 17 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue, US Patent No. 4,816,323.

Inoue discloses, referring to figure 2E, a ceramic circuit board comprising, a ceramic substrate (1) having a through hole (20), a metal column (22) arranged within the through hole; and metal circuit plates (23) attached to both surfaces of the ceramic substrate in such a way as to stop up the through hole (see figure 2E), wherein the metal circuit plates attached to both surfaces of the ceramic substrate are connected to each other by the metal column, and wherein, between an inner wall surface of the through hole and an outer wall surface of the metal column is secured a space (filled by film 21) [claim 9, 16] which is 30 to 200 pm long (hole 20 has a .3mm diameter, wiring 22 has a 0.1 mm diameter [claim21] leaving a 0.2mm clearance, see col. 2, lines 1-20) [claim 17], wherein the metal circuit plate is made of copper or aluminum (see col. 3, lines 50-55) [claim 10)], wherein the metal column is made of copper or aluminum (see col. 3, lines 50-55) [claim 11].

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 2841

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 18, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue.

Regarding claim 18, Inoue discloses all the features of the claimed invention as applied to claim 9 above, but does not disclose the circuit plate has its surface plated with a layer made of nickel. However, nickel plating is well known in art for increasing the adhesiveness of the circuit plate to avoid the problem of peeling. Therefore, it would have been obvious to a person of ordinary skill in the art at the time of applicant's invention to provide nickel plating to the circuit plate of Inoue, in order improve the adhesiveness to avoid peeling.

Regarding claims 19, Inoue discloses all the features of the claimed invention as applied to claim 18 above, but does not disclose the plate layer made of nickel-phosphorous alloy containing phosphorous in an amount of 8 to 15 wt%, as claimed in claim 19. However, the claimed material is known in the art to be used in the circuit board. Further, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ. Therefore, it would have been obvious to a person of ordinary skill in the art at the time of applicant's invention to provide the circuit board of Inoue with the plate layer made of the material as claimed as it is known in the art.

Regarding claim 20, the modified circuit board of Inoue discloses the plate layer 1.5 μ thick ((column 3, lin3 45-50).

Response to Arguments

4. Applicant's arguments with respect to claims 9-11 and 16-21 have been considered but are most in view of the new explanation of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
